## Tingkat Komponen Dalam Negeri

A regulatory framework established by the Government of Indonesia to increase the use of local components in the production of goods and services.

## Environment Product Declaration: EPD

Environmental Label based on ISO 14025 and EN 15804 certifications related to environmentally friendly manufacturing processes, verified by an internationally recognized central committee. These certifications ensure that the products meet global standards, are safe, and suitable for use.

## U.S. Green Building Council

Adds credits to buildings that contribute toward LEED certification by the U.S. Green Building Council.

7705 : 2020

## Standar Nasional Indonesia

Products with the Indonesian National Standard (SNI) to deliver the best quality for customers.

License No.041-005

Made from 30% Recycled Materials

## Green Label Certification

Green label certification as a product that uses environmentally friendly materials and supports energy conservation.

## Certified with the First Carbon Label

Carbon label registration standard from the Greenhouse Gas Management Organization (Public Organization) and the Environmental Institute Foundation.

## **RB SHERA for a Sustainable Environment**

RB SHERA is committed to supporting the realization of every building owner's and innovator's vision through environmentally friendly RB SHERA product innovations, aiming to create better future buildings with a strong focus on sustainable environments.

## **RB SHERA creates buildings with natural aesthetic beauty**

As an innovator of Silicate Board products that can substitute real wood for various building applications, RB SHERA not only focuses on product functionality but also positions itself as an innovator that upholds aesthetic value through natural textures and colors inspired by nature.

# *Green Innovation*

RB SHERA responds to our customers and their family with innovative development of wood substituted products for flooring, walling and ceiling applications that serves all needs in your home and other buildings.

RB SHERA has become the most comprehensive innovator of wood substitute silicate boards by prioritizing advanced manufacturing technology with global standards, which includes:

**Autoclave Technology**

Under internationally recognized Autoclave technology, RB SHERA Silicate Boards become one of the most perfected materials. Our products are cured in a pressure- and heat-controlled chamber to ensure that every piece of Silicate Board meets the same quality standards. All RB SHERA products are of high international quality standards.

**Green Technology**

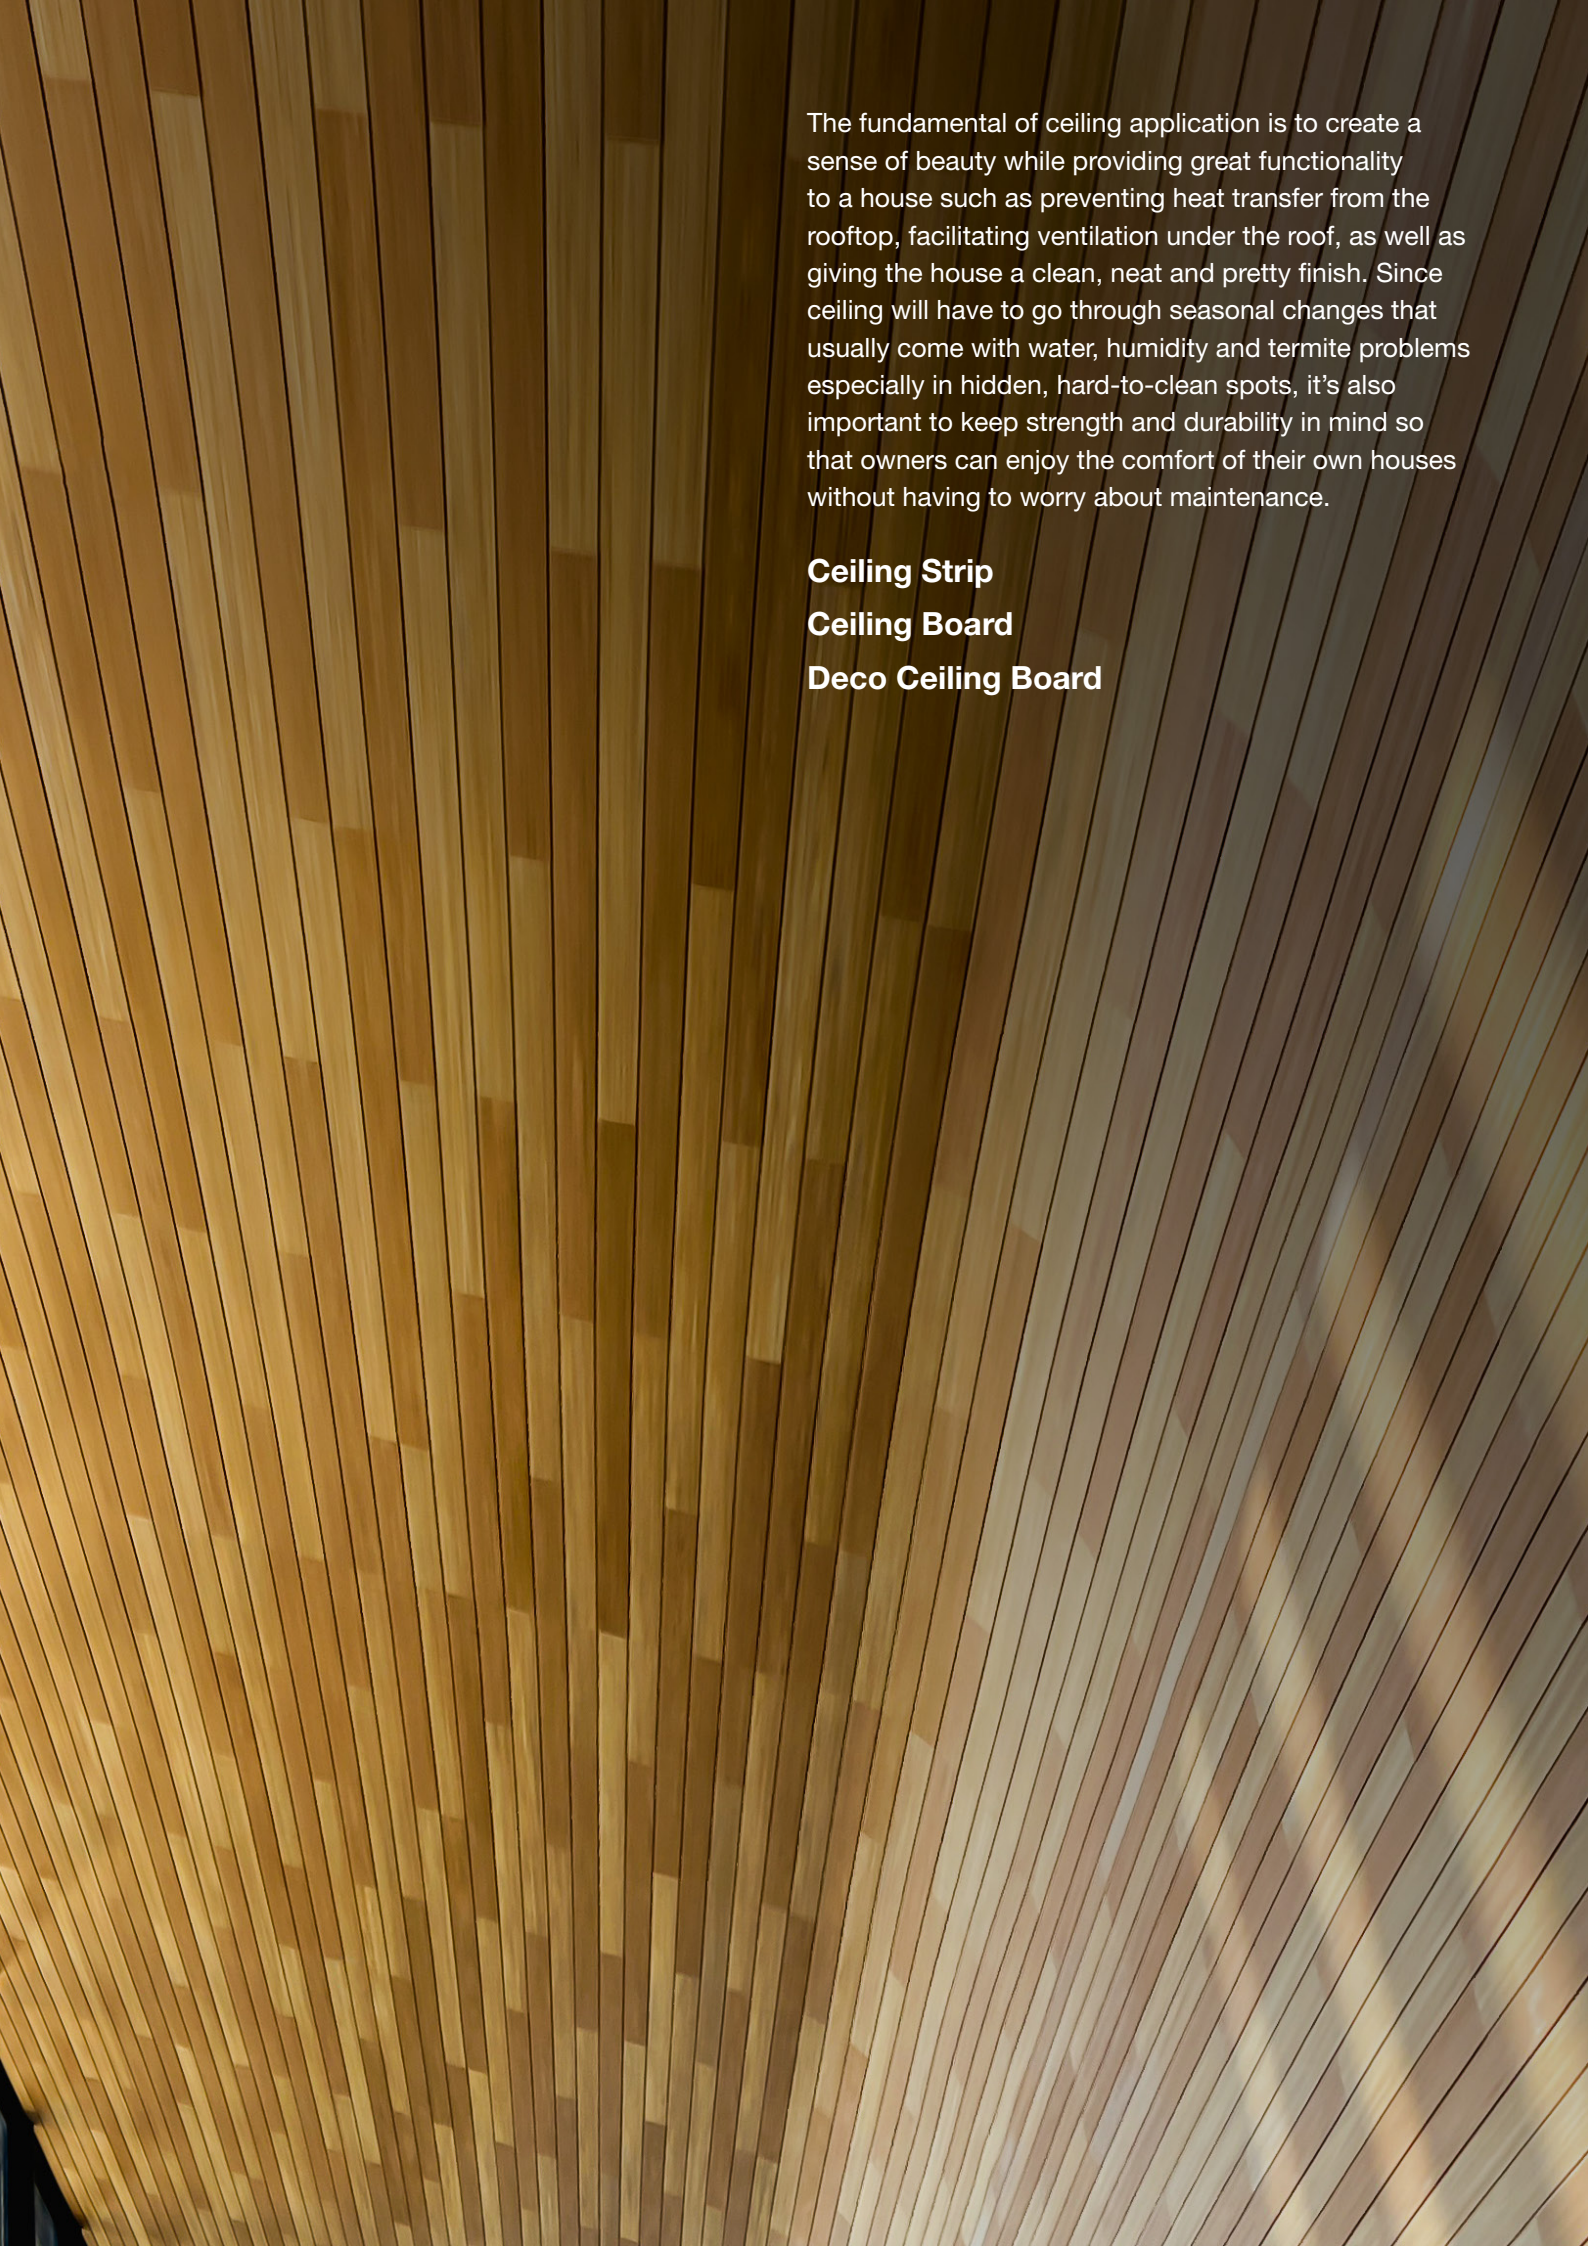

The entire RB SHERA production process emphasizes green policies that consider environmental concerns, energy efficiency, and waste minimization, with a focus on renewable energy (Green Technology). This approach ensures alignment with the rapid pace of global climate change and supports a harmonious, balanced coexistence between humans and nature (Green Living).

# Ceiling Solutions

The fundamental of ceiling application is to create a sense of beauty while providing great functionality to a house such as preventing heat transfer from the rooftop, facilitating ventilation under the roof, as well as giving the house a clean, neat and pretty finish. Since ceiling will have to go through seasonal changes that usually come with water, humidity and termite problems especially in hidden, hard-to-clean spots, it's also important to keep strength and durability in mind so that owners can enjoy the comfort of their own houses without having to worry about maintenance.

**Ceiling Strip**

**Ceiling Board**

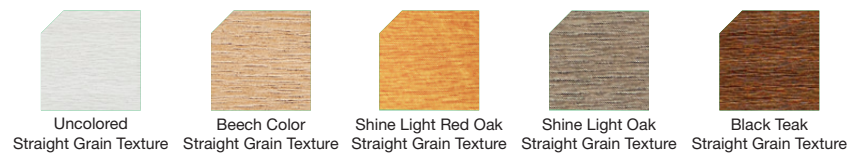

**Deco Ceiling Board**

## Ceiling Strip

Building your ceiling with Ceiling Strip is a great way to improve ventilation effectively, leaving your indoor space cool and comfortable. It also gives you the flexibility to achieve the ultimate beauty for any indoor and outdoor ceiling designs.

Ceiling Strip is strong and durable in any weather conditions and comes with different color choices from natural wood grains all the way to painted wood options and Shine Light series.

### Product Information

Texture	Color	Profile	Dimensions (mm) (Thickness *Width* Length)	Weight (kg/pcs)	Quantity (pcs/sqm <sup>2</sup> )

## Wall Cladding

As an exterior wall of a building, the material must be strong and highly weather-resistant. In Indonesia's tropical climate, the material must withstand alternating heat and heavy rain.

Wall Cladding offers resistance to fire, water, and impact. Its installation is recommended on a steel framework that matches the required design, dimensions, thickness, and recommended spacing. Other parameters should also be considered, such as wind load, static load, wall height, and seismic risk level.

## Zedar Shake

Add a touch of natural beauty to your roof design with Zedar Shake, an innovative roof material that holds the natural look and beautiful texture of real wood. Zedar Shake possesses the finest quality, well-known durability guaranteed by high quality manufacturing processes, termite resistant property and Inter-Locking system, water leakage prevention system certified by ASTM C1530-04 Standard. You can rest assured that sub roof is not needed, installation time and cost will be lower, and maintenance is minimal.

Bring a little charm to your wood-like roof with our

'Color Through' technology, the method we use to pigment color thoroughly and evenly into the product. There're 3 shades of dark colors to be chosen from: Yellow Zante, Brown Chestnut and Black Wenge along with 3 tile widths to fit your design. Therefore it's easy for any designer and owner to craft their masterpiece home or building projects which are truly a feast for the eyes.

**Yellow Zante** 481

This is one of the bark themed colors that comes in a light yellowish shade, giving a sense of gentle and warm touch of nature like a color of pine trees in the summer or the warm light of the sun. And with the bark texture combined, this is a perfect way to fill your home with warmth and relaxation every day.

**Brown Chestnut** 482

Calm and comfort blend perfectly in this natural shade from our bark themed colors, designed by drawing out the beauty of pine trees in the rainy season. Pine trees turn into darker shade due to humidity in rain forest. This color will make your time at home feel even more peaceful, relaxing, and appealing.

**Black Wenge** 483

This dark shade of bark color comes with hidden charm and strength just like pine trees during winter. With the presence of white snow, the dark color creates contrast on the roof. And this sense of elegance and solemn is what makes your roof more attractive and stand out.

**Metro Grey** 484

This grey color represents coolness and luxury of metropolis. Inspired by worn out cedar roof, stain and uneven color is enhanced with grey color gradient to create the perfect harmony between nature and civilized society.

**Product Information**

Zedar Shake Roof Quantity Per 1 Box (Usage quantity: 0.8 sq.m./box)

Width (mm)	Length (mm)	Thickness (mm)	Weight (kg/pcs)	Quantity (per box)

150	350	12	1.19	10 pcs
200	350	12	1.47	10 pcs

200 x 350 mm 150 x 350 mm 100 x 350 mm

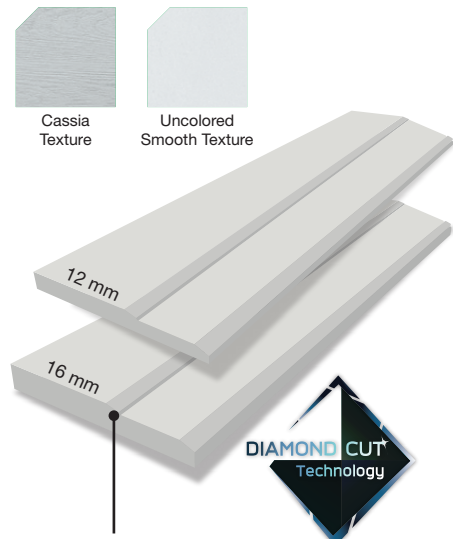

## Eaves One Plus

This is the kind of eaves designed for roof decoration aiming for a “beautiful, durable and quick” finish. Cover joints between two materials and hide the untidy cut ends of roof’s rafters and sheathing with eaves that are ready to use and complete in one step.

Eaves One Plus is beautifully designed to mimic the appearance of 2 overlapping planks, creating dimensions for each piece. The texture is tough and non-brittle. Thickness options include 16 mm. and 22 mm. with the length options between 3 and 4 meters.

*Eaves One Plus can reduce installation process from two steps down to one (compared to normal eaves installation)*

### DIAMOND CUT Technology

With Computer Numerical Control (CNC) makes cutting process precise and ensures all planks meet exact specifications.

## Product Information

Texture	Color	Profile	Dimensions (mm) (Thickness *Width* Length)	Weight (kg/pcs)	Jumlah (lbr/m <sup>2</sup> )
Cassia	Uncolored	Eaves one plus	12 x 235 x 3000	11.62	1.42
Smooth			16 x 235 x 3000	15.29	1.42

# RB SHERA™

## Inovasi Bangunan Tanpa Batas

### TKDN

#### Tingkat Komponen Dalam Negeri

A regulatory framework established by the Government of Indonesia to increase the use of local components in the production of goods and services

7705 : 2020

#### Standar Nasional Indonesia

Products with the Indonesian National Standard (SNI) to deliver the best quality for customers.

#### Environment Product Declaration: EPD

Environmental Label based on ISO 14025 and EN 15804 certifications related to environmentally friendly manufacturing processes, verified by an internationally recognized central committee. These certifications ensure that the products meet global standards, are safe, and suitable for use

#### U.S. Green Building Council

Adds credits to buildings that contribute toward LEED certification by the U.S. Green Building Council.

#### Fybertec Technology

RB SHERA comes with advanced Fybertec technology, a special fiber formula designed to optimize density and flexibility, enhancing the strength and durability of RB SHERA products.

Crack-resistant during the screwing / fastening process

Resistant to bending during the installation process

Resistant to surface scratches during the cutting process

License No.041-005  
Made from 30% Recycled Materials

#### Green Label Certification

Green label certification as a product that uses environmentally friendly materials and supports energy conservation

#### Certified with the First Carbon Label

Carbon label registration standard from the Greenhouse Gas Management Organization (Public Organization) and the Environmental Institute Foundation.
